**Midwestern Regional Workshop on Spent Fuel
Transportation Security Requirements**

Earl Easton, facilitating

Committee members will engage in a regional discussion of proposed changes to the NRC's security requirements for shipments of spent fuel. The workshop will begin with an overview of the NRC's proposed rulemaking, including the timeline for finalizing the new rules. Participants will then delve more deeply into the proposed changes, walking through the rulemaking and sharing their perspectives on the potential benefits and the possible impacts on state programs.
